TopGlass is a material that simulates an optical effect of glass, but much lighter and resistant to breakage. In addition, it works with the same tools and hardware as wood. We present two finishes: mirror gloss and acid-etched glass-effect extra-matte anti-fingerprint.

Features

Optical effect of glass.

Lighter and more resistant to breakage than real glass.

Same work tools and hardware as wood.

Easy cleaning.

Certified as an antibacterial material.

Anti-fingerprint in the case of the Matt finish.

The gloss remains sharp regardless of the viewing distance in the case of the Glow finish.

Take care of small details and finishes, allowing a 45° bevel or chamfer.

Easy access, availability from a dashboard.

Resistance to light so the colors remain unaltered.

Scratch and abrasion resistance.

Board with low emission of formaldehyde E-Z that takes care of the quality of the air in interior spaces.

Gloss Matt 8° | Glow 90° Brightness

Finishes

GLOW

Set of light shades in high quality mirror effect shine.

MATT

Palette of neutral tones in an anti-fingerprint matte finish with an extra acid glass effect.

For vertical use surfaces

Kitchen fronts, office furniture, custom
