Finsa

With over ninety years of experience, Finsa is a company that has pioneered the transformation, development and manufacture of products derived from wood. In connection with the ecosystem, Finsa continues to work in response to the needs of the interior design and construction sector; in short, to contribute towards the creation of spaces we will be inhabiting in the coming years.

The company has made advancements over the years without losing its essence, adapting to changing times, with sustainability as its core value and design as an idea for the future. The transformation process to which the raw material is subjected means that the wood does not lose its properties, but rather improves its efficiency through an industrial process based on the circular economy system.

Finsa has design embedded in its DNA - not only as a fundamental part of the creation of its products, but also as one of its strong points of brand identity.

In this colour chart we incorporate the latest developments in decorative surfaces, offering a wide variety of options in decorative materials. In all these products and designs you can find a wide diversity, including from more timeless surfaces to other more innovative proposals, offering great options for combinability between them, even between the different ranges.

#connectingwood

Connect with Finsa

Finsa.com:

a website with all
the information

The Finsa website is a tool that allows you to quickly and intuitively consult information on our wide range of products, including technical data sheets, catalogues and availability guides. It also gives you the opportunity to find out about the nearest distributors and the latest news from Finsa and the sector. In addition, architects, designers and interior designers can find inspiration on the website, thanks to the collection of projects made with our materials.

Finsa Space Generator:

compare and choose
to your liking

Making interior design decisions and advising your clients on trends has never been easier: compare different designs from our range on your screen in the Finsa Space Generator.

How does our Space Generator work? Thanks to the "Comparison" mode, you can display two looks in the same room configuration at the same time. The detailed view allows you to see the effect of the design on the corresponding finish. Do you need to use and share those results outside our digital generator? You can create a report with all the details of the materials sampled for each setting.

Sample service:

as and when you want

Seeing is better than imagining. We have samples where you can find a wide variety of our decorative surfaces. And if you want more detail to make the final decision, ask for our samples in A4 size.

Consultancy support:

we are part of your team

Finsa's Consulting team is made up of professionals with extensive experience in the area of architecture, interior design and design projects. Their job will be to accompany you during your projects to advise you on wood solutions. We can offer recommendations regarding partners who can support the execution of the work, such as specialised distributors, manufacturers and installers. In addition, we work on portfolios and other tools where we compile projects that use our materials to show product applications and help to inspire you for your own jobs.

Service programme:

all in one place

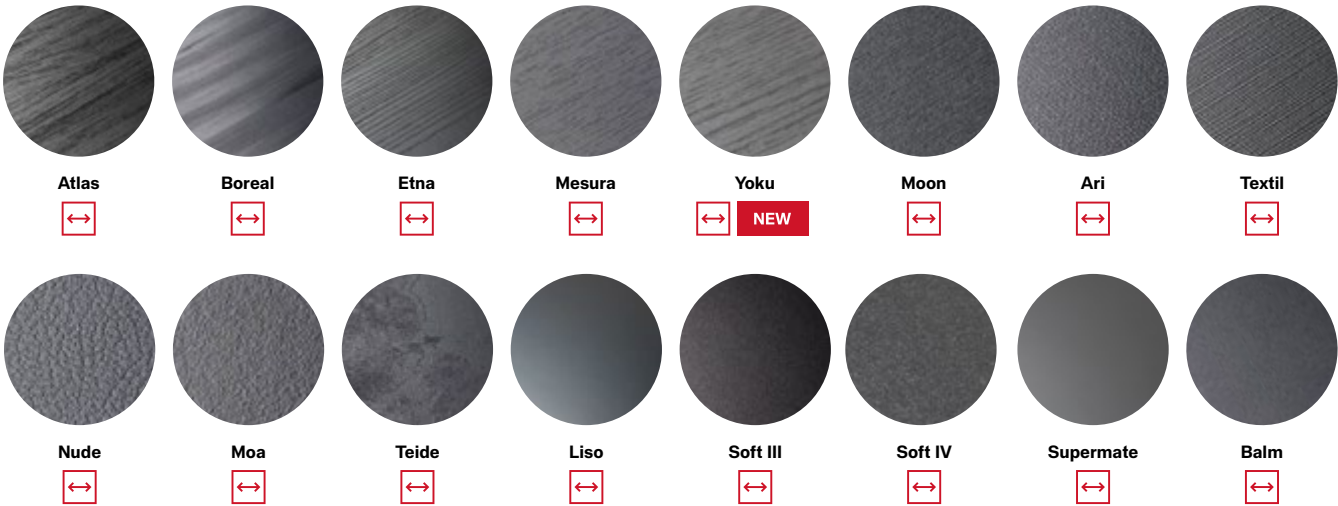

At Finsa we understand that the success of a project does not depend solely on the design or the final finish. It also depends on having accessible materials, tailor-made solutions and a service that responds quickly, accurately and with commitment. That is why we have developed a comprehensive service programme that goes far beyond aesthetics. This proposal makes available a carefully structured offer of sizes, baseboards, thicknesses and formats, with the aim of making your daily work easier. Because we know that when the technical aspects are solved, the design can go much further.

Accessories

ABS edgebanding

Available ranges: Duo, Studio, L100, Solid, Technical Matt, Grip, Sense Natur, CompacDecor®.

Acrylonitrile butadiene styrene (ABS) is a thermoplastic material widely used in the furniture industry due to its high strength and light weight, and is also environmentally friendly. Matching colour and texture to the board is a must. Therefore, the perfect decorative combination with regard to colour, gloss level and texture is offered by the ranges of the Decorative Surfaces collection and its accessories.

Laminates

Available ranges: Duo, Studio, L100, Technical Matt.

High pressure laminate is a practical and durable alternative for demanding uses and environments. Thanks to its high-strength surface properties, it is widely used in various fields. Its excellent physical-mechanical performance and surface strength make high pressure laminate (HPL) one of the most popular materials in interior design, as it is a perfect solution for both horizontal and vertical cladding.

Xtraflex

Available ranges: Duo, Studio, L100, CompacDecor®.

Xtraflex is a 0.2 mm flexible laminate, ideal for curved moulding or cladding applications. Unlike other similar materials, this laminate provides flexibility and additionally achieves an exact reproduction of the design and finish of the decorative board.

Screw cap kit

Available ranges: Duo, Studio.

The self-adhesive caps are offered as an accessory to all designs in the Duo and Studio ranges. They are mainly used to cover unused drill holes or screw heads in any kind of furniture. Additionally, they can be used to cover up any accidental surface flaw.

Finflex

Available ranges: Natur, Studio Natur.

Finflex is a sheet composed of natural wood veneer layers bonded and pressed on a non-woven backing composed mainly of cellulose. This allows its mechanical properties to be increased, facilitating its handling and subsequent application on any wooden surface. It is presented with a sanded face.

Wood veneer edgebanding

Available ranges: Natur, Studio Natur.

To finish your projects, Finsa offers matching edges for our Natural Decorative Surfaces. The complete solution that allows you to take care of the smallest details. Natural wood edge sanded and not glued, 1 mm thick.

Varnished veneer edge

Available ranges: Sense Natur

To finish your projects, Finsa offers edges to match the Sense Natur range.

Topglass acrylic edgebanding

Available ranges: Topglass.

The perfect combination of edging to finish off the Topglass board.

Linum, Suede and Leather sheet

Available ranges: Fabric.

For any material requirement in a project, in addition to the Fabric range of boards, we also offer flexible sheet, a genuine textile that offers versatility with genuine textile qualities.

Solid foil

Available ranges: Solid.

For any project's material requirements, Finsa, in addition to the Solid range of boards, also offers the polypropylene foil of the same material, both in matt anti-fingerprint finish and in glossy finish in the full range of colours of this range.

Grip sheet

Available ranges: Grip.

As an accessory to the Grip board, we also offer the Grip in anti-slip laminate sheet.

Topglass acrylic sheet

Available ranges: Topglass

For any material requirement in a project, Finsa, in addition to the Topglass range of panels, also offers the acrylic sheet for individual handling in the most demanding spaces.

Touch-up marker

Available ranges: Sense Natur

Coloured markers to match the Sense Natur range for small touch-ups on the surface or edges of the board. The product is based on a fast drying, water and detergent resistant, matt acrylic varnish solution.
