Finsa

Finsa è un'azienda che, con oltre novant'anni di esperienza, è stata pioniera nella trasformazione, nello sviluppo e nella produzione di prodotti derivati dal legno. Finsa continua a lavorare a stretto contatto con i luoghi in cui si trova per rispondere alle esigenze del settore dell'interior design e dell'edilizia. Insomma, per contribuire a creare gli spazi che abiteremo nei prossimi anni.

Nel corso degli anni l'azienda è cresciuta, senza perdere la sua essenza, ma adattandosi ai nuovi tempi, radicata nella sostenibilità e guidata dal design. Il processo di trasformazione a cui viene sottoposta la materia prima fa sì che il legno non perda le sue proprietà, ma ne migliora l'efficienza attraverso un processo industriale basato sul sistema dell'economia circolare.

Finsa ha il design nel suo DNA, non solo come parte fondamentale della creazione dei suoi prodotti, ma anche come uno dei suoi punti di forza e della sua identità di marchio.

In questa cartella colori sono presenti le ultime novità nel campo delle superfici decorative, offrendo un'ampia varietà di opzioni nei materiali decorativi. In tutti questi prodotti e design è possibile trovare un'ampia varietà, che va dalle superfici più intramontabili ad altre proposte più innovative, offrendo grandi possibilità di combinazione, anche tra gamme diverse.

#connectingwood

Connect with Finsa

Finsa.com:

un sito web con tutte
le informazioni

Il sito web di Finsa è uno strumento che consente di consultare in modo rapido e intuitivo le informazioni sulla nostra ampia gamma di prodotti, tra cui schede tecniche, cataloghi e guide agli ordini. Il sito offre anche l'opportunità di conoscere i distributori più vicini e le ultime novità di Finsa e del settore. Inoltre, architetti, designer e interior designer possono trarre ispirazione dalla raccolta di progetti realizzati con i nostri materiali.

Simulatore di ambienti Finsa:

confronta e scegli
in base ai tuoi gusti

Prendere decisioni di interior design e consigliare i propri clienti sulle tendenze non è mai stato così facile: confronta sul tuo schermo diversi design della nostra gamma nel generatore di ambienti Finsa.

Come funziona il nostro generatore di ambienti? Grazie alla modalità "Confronto", è possibile visualizzare contemporaneamente due ambienti nella stessa configurazione di stanza. La vista dei dettagli consente di vedere l'effetto del design sulla finitura corrispondente. Devi utilizzare o condividere questi risultati al di fuori del nostro generatore digitale? È possibile creare un report con tutti i dettagli dei materiali testati per gli ambienti.

Servizio campioni:

come e quando vuoi

Vederlo è meglio che immaginarlo. Abbiamo campioni di decorativi che permettono di scoprire l'ampia varietà delle nostre superfici decorative. E se vuoi maggiori dettagli per prendere la decisione finale, richiedi i nostri campioni in formato A4.

Supporto alla consulenza:

siamo parte del tuo team

Il team di consulenza tecnica di Finsa è composto da professionisti con una vasta esperienza nel campo dei progetti di architettura, di interior design e design. Il loro compito sarà quello di accompagnarti nei tuoi progetti per consigliarti le migliori soluzioni in legno. Possiamo fornire raccomandazioni sui partner che supportano l'esecuzione dei lavori: distributori specializzati, industriali e installatori. Inoltre, lavoriamo sul portfolio e altre risorse in cui registriamo i progetti con i nostri materiali per mostrare il prodotto applicato e ispirarti per i tuoi lavori.

Programma di supporto:

tutto in un unico luogo

In Finsa sappiamo che il successo di un progetto non dipende solo dal design o dalla finitura. Dipende anche dalla disponibilità di materiali accessibili, di soluzioni su misura e di un servizio che risponda con rapidità, precisione e dedizione. Per questo abbiamo sviluppato un programma di supporto completo che va ben oltre l'estetica. Questa risorsa mette a tua disposizione un'offerta accuratamente strutturata di supporti, dimensioni, spessori e formati, con l'obiettivo di facilitare il tuo lavoro quotidiano. Perché sappiamo che una volta risolti gli aspetti tecnici, il design può andare molto più lontano.

Complementi

Bordi in ABS

Gamme disponibili: Duo, Studio, L100, Solid, Technical Matt, Grip, Sense Natur, CompacDecor®.

L'acrilonitrile butadiene stirene (ABS) è un materiale termoplastico ampiamente utilizzato nell'industria del mobile per la sua buona resistenza e leggerezza, oltre che per il suo minore impatto sull'ambiente. Nel pannello, è fondamentale abbinare colore e texture. La combinazione decorativa perfetta in termini di colore, livello di lucentezza e texture è offerta dalle gamme della collezione Decorative Surfaces e dai suoi complementi.

Laminato

Gamme disponibili: Duo, Studio, L100, Technical Matt.

Il laminato ad alta pressione è un'alternativa pratica e durevole per usi e ambienti difficili. Grazie all'alta resistenza superficiale, è usato ampiamente in vari campi. Le eccellenti prestazioni fisico-meccaniche e la resistenza superficiale rendono il laminato ad alta pressione (HPL/CPL) uno dei materiali più popolari nell'interior design, essendo una soluzione perfetta per rivestimenti e applicazioni sia orizzontali che verticali.

Xtraflex

Gamme disponibili: Duo, Studio, L100, CompacDecor®.

Xtraflex è un laminato flessibile da 0,2 mm, ideale per applicazioni di stampaggio o rivestimento curvo. A differenza di altri materiali simili, questo laminato offre flessibilità e consente di riprodurre esattamente il design e la finitura del pannello decorativo.

Kit coperture viti

Gamme disponibili: Duo, Studio.

Le coperture per le viti sono offerte come complemento a tutti i design delle gamme Duo e Studio. Sono costituite da fogli autoadesivi, utilizzati principalmente per coprire i fori inutilizzati o le teste delle viti in qualsiasi tipo di mobile. Possono essere utilizzate anche per mascherare eventuali danni superficiali causati accidentalmente.

Finflex

Gamme disponibili: Natur, Studio Natur

Finflex è una lamina composta da fogli di impiallacciatura incollati e pressati su un supporto in tessuto non tessuto, composto principalmente da cellulosa. Ciò consente di migliorarne le proprietà meccaniche, favorendone la manipolazione e la successiva applicazione su qualsiasi supporto in legno. Si presenta con una faccia levigata.

Bordo in impiallacciatura di legno

Gamme disponibili: Natur, Studio Natur

Per completare i vostri progetti, Finsa offre bordi coordinati con le nostre superfici decorative naturali. Una soluzione completa che vi permette di curare i minimi dettagli. Bordo in legno naturale levigato e non incollato, spessore 1 mm.

Bordo in impiallacciatura verniciata

Gamme disponibili: Sense Natur.

Per rifinire i vostri progetti, Finsa offre bordi coordinati con la gamma Sense Natur.

Bordo in acrilico Topglass

Gamme disponibili: Topglass

Il bordo perfetto per rifinire il pannello Topglass

Lamina di lino, camoscio e pelle

Gamme disponibili: Fabric.

Per progetti dalle esigenze specifiche, oltre alla gamma di pannelli Fabric, offriamo anche lamina flessibile, un vero e proprio tessuto versatile che preserva le proprietà dei tessuti.

Lamina in Solid

Gamme disponibili: Solid.

Per progetti dalle esigenze specifiche, oltre alla gamma di pannelli Solid, Finsa offre anche la lamina di polipropilene dello stesso materiale, sia in finitura opaca anti-impronta che in finitura lucida nell'intero ventaglio di colori di questa gamma.

Lamina Grip

Gamme disponibili: Grip.

Come complemento per il pannello Grip, offriamo anche il Grip in lamina antiscivolo.

Lamina acrilica Topglass

Gamme disponibili: Topglass

Per progetti dalle esigenze specifiche, oltre alla gamma di pannelli Topglass, Finsa offre anche la lamina acrilica, per gestire individualmente gli spazi più esigenti.

Pennarello per ritocchi

Gamme disponibili: Sense Natur.

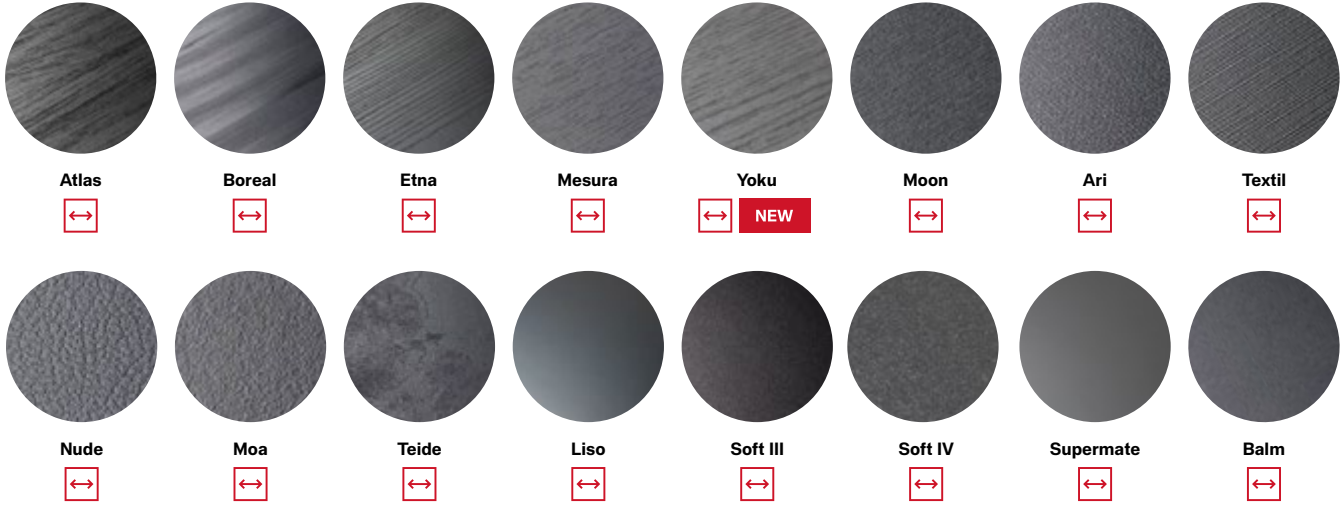

Pennarelli colorati della gamma Sense Natur per piccoli ritocchi sulla superficie o sui bordi dei pannelli. Il prodotto si basa su una soluzione di vernice acrilica opaca a rapida essiccazione, resistente all'acqua e ai detersivi.
